

### Reflection

- Reflect on a time when you felt heard as a child/young person.
- How did you feel heard?
- Who heard you?
- What were some of the qualities of being listened to?

childhood.org.au

### **Rights based Framework**

- In 1991 Australia ratified the United Nations Convention on the Rights of the Child- UNCRC.
- All Children have the same rights.
- $\bullet$  All rights are connected to each other, and are all equally important.
- As children grow, they have more responsibility to make choices and exercise their rights.

Imr	lementir	a A	Artic	le 12

"The strongest argument for guaranteeing the implementation of Article 12. derives from its capacity to harness the wisdom, authenticity, and currency of children's lived experience in order to effect change." (Lundy, 2007)

"We recognize children as competent humans who have the inherent right and capability to contribute to decisions that affect their lives. Children are key informants and experts on their own lives (MacAuaghton, et al., 2003) and, indeed, are our best source of advice for matters affecting them." (Harris & Mantaldin, 2013)

"If you had a problem in the black community, and you brought in a group of white people to discuss how to solve it, almost nobody would take that panel seriously, in fact, there'd probably be a public outcry. It would be the same for women's issues or gay issues. But every day, in local areas all the way to the White House, adults sit around and decide what problems youth have and what youth need, without ever consulting us."

Jason, 17, Youth Force Member, Bronx, NY - (Lansdown, 2011)

childhood.org.au

### **Implementing Article 12 - Example:**

The Scottish Commissioner for Children and Young People has developed a strategy for involving children and young people. To ensure that their involvement is meaningful and practical, they are divided into the following age groups:

- Reference Group, 14-21 years to support and advise SCCYP on matters of organizational development
- Consultation Groups- 5 -13 years- to advise on policy, recruitment and communications, and on how to involve younger children
- Early Years Events, 0-4 years, to gather the views of very young children through play, stories and consultations with play workers, nursery nurses and parents.

In line with Article 12 (1) of the UNCRC, children's level of influence is given due weight in accordance with their age and maturity. (Lansdown, 2011)

Foundations	for	lictonina	to Children	and Valina	Doonle
roundations	101	usteriiru	to Cilliaren	anu rounu	reonie

- Respect What are our views of children?
- Openness and Collaboration We need to be open to preferred ways that children choose to communicate- and we need to respond in their preferred ways- learn from others who know the child well
- Honesty- We need to be honest about why we are listening, and about how far we may be able to act upon children's views and to explain how other people's views may need to be taken into account.

   Patience and Timing- Children's timing may be different from our own.
- Fratience and mining continuers stilling may be different norm out own.
   Imagination- We need to listen to how children are expressing themselves. We need to design ways of listening which are enjoyable and varied and which take into account children's different strengths and abilities.

### Children's Knowing

"Children have unique ways of knowing and an authentic body of knowledge about their lives, needs, concerns, and views which derive from their direct lived experience." (Lansdown, 2011)

"Children have unique, interesting, creative ideas and are very hopeful" Participant- Consultations with Children and Young People in Ireland- (Horgan, 2017)

"Children are active constructors of meaning with voices to be heard and capacity to express their views with wisdom and insight." (Harris & Manatakis, 2013)

https://www.youtube.com/watch?v=f0tEcxLDDd4

childhood.org.au

"The right to speak is the right to be listened to; in practice there is a gap between speaking and being listened to"

A young person at Shaking the Movers conference, 'Speaking Truth to Power: Civil and Political Rights of Children, Cartleton University, Canada, 2007

Equipolations	for Children/Vo	una Poonlo's /	Active Participation

"Active participation refers to situations where there is 'empowerment of those involved- that children believe, and have reason to believe, that their involvement will make a difference" (Sindair, 2004)

 Participation should mean more than listening to or consultation to seek the views of children. How the child's participation has affected the actual decision is becoming an increasingly important consideration when defining participation.

### **Digital Story Telling**

Digital Story telling by young people who were part of the "Fathering Challenges" research project <a href="https://vimeo.com/kristindiemer">https://vimeo.com/kristindiemer</a>

- With permission these videos were shown to Dads participating in a group for fathers who use violence.
- A facilitator said that groups are shocked by the videos.
- One of the men said he felt like crying to think that his actions had badly affected his children.
- Watching the videos is an important way of motivating Dads to change because they don't want to hurt and alienate their children.

### Foundations for Children/Young People's Active Participation

Children must feel confident they have the time and space to express a range of views, to change their mind, to be inconsistent, but still respected for their unique insight. (McDowall, 2016)

"Listening to young children can create the time and space in which they can Listening to young children and deated the line and space in which they can reflect, and in doing so, help them to process and understand what is happening. 'It's not so much a matter of eliciting children's performed ideas and opinions, it's much more a question of enabling them to explore the ways in which they perceive the world and communicate their ideas in a way that is meaningful to them." (Tolfree & Woodhead 1999)

### Foundations for Children/Young People's Active Participation

- We need to accept that children can participate and be kept safe (not seeing the two outcomes as incompatible alternatives)
- Children and Young People must have knowledge, opportunity, and support before they can participate effectively. The role played by significant adults (parents, caregivers, caseworkers) is recognized as playing a pivotal role in facilitating or inhibiting participation as they are important players in helping to bring about change. (McDowall, 2016)
- Dialogue between children and adults, rather than just 'listening', has been identified as one of the most crucial dimensions of meaningful child participation (Lodge, 2005; Mannion, 2007)

## **Children's Day Example** London Play group - For children under 5 London Play group – For children under 5 The group were discussing Mothers Day which was coming up. A child enquired when was Children's Day? The workers talked about there not being an official Children's Day and asked the children if there was a Children's Day what they would like to do? The children said paint the hall pink. (The hall was a space shared by many different groups) The playgroup took the children's suggestion seriously and on their Children's Day there was a party where the children could make special glasses and choose the colour of the lenses, so they could make the hall pink.... Or whatever colour they liked.

An example of listening and involving being embedded into practice

### Foundations for Children and Young People's Active Participation

Lundy suggests a good way to focus on more dialogue occurring is the focus on the Four F's when it comes to Feedback:

Full: Responses need to be more detailed and extensive.

Friendly: Responses need to be child friendly and accessible.

Fast: Children readily 'age out' or move on from services- so a speedy initial response acknowledging their involvement plus progress updates can be useful.

Followed Up: Seek encounters with children and young people that are more ongoing compared with one offs.

### Key Questions to consider before asking children and young people to participate

- . What do we hope to achieve?

  2. Where have we got so far?

  3. What will children and young people get out of it?

  4. Are we prepared to resource it properly?

  5. Why have we not done it before?

  6. Are we being honest with the children and young people?

  7. What are our expectations?

  8. Are we prepared to take some criticism?

  10. Do we recognize this as a long-rem commitment?

  10. Do we recognize this as a long-rem commitment?

  11. Are we prepared to build in changes long term, and not just have a one-ciff event?

  12. What is our just for how to deal with potential harm or risk related disclosures?

  Aspekt from Claim O'Konn's -Claters' Puricipation in the Analysis, Planning and Design of Phograms (D315)

childhood.org.au

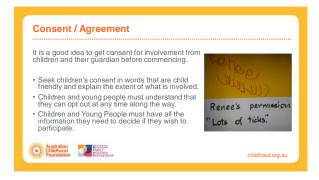

### **Ethical Considerations**

- Children and young people must understand the purpose and nature of the participatory process.
  Participation must not harm or place at risk children and young people.

- Participation needs to be voluntary.
   Workers should have procedures for dealing with children's disclosures of harm.
   Workers should have procedures for responding should they become concerned about the safety of a child.
- Children and Young People who are providing feedback should be made aware of what will happen with their feedback.
- Organizations/programs should have processes to feedback to children and young people how they have heard and integrated children's input.
- Children and young people should be made aware at the outset whether their contribution will be kept confidential if they choose to participate.

### **Modes of Participation**

Children and young people can participate in activities, processes and decision-making in broadly three different ways: consultative, collaborative, or child/young person led. Each mode offers differing degrees of empowerment and influence, and are all legitimate and appropriate in different contexts. It is important not to perceive them in term of a hierarchy of sorticement. of preference.

### Modes of Child/Young Person Led Participation No Participation Consultative Participation Collaborative Participation **Participation**

**Action Feedback** For Children and Young People

### Origins of the Feedback Kit

- The Melbourne Eastern Metropolitan Regional Family Violence Partnership was established in 2007 under the Victorian family violence reforms, as an alliance of organisations committed to working together to address family violence in the region.

  The Partnership acknowledged that children and young people are a particularly vulnerable group who lack voice across the family violence service sector, despite being strongly impacted by the effects of family violence.

  A literature review was commissioned to scan for existing frameworks or tools geared for collecting feedback from children and young people in child friendly ways. Little was found.

- The Action Feedback Tool emerged from inter-agency collaboration and engagement with children and young people.

childhood.org.au

### **Cultural Considerations with Kit engagement**

- It is best for all children to engage with this kit in an environment of trust.
  Consider who is best to administer the kit with the child/young person.
- · Consider the most appropriate space to meet with children/young people.
- Consider the best format for providing information.
- · Use translations and interpreters where appropriate.
- Consider that in some cultures it is unusual to seek the views of children independently of adults.
   Understand that expressing negative feedback can be very uncomfortable for people of some cultures. Seek ways to aid children feel safer to express their views.

## Kit Adaptation - Tower Game Part B. questions have been stuck on most of the 48 blocks. For this activity remove one block each turn from the tower, without knocking the tower over. Decide on a fun thing to do if a non-question block is removed, eg. the person or the group will do 4 star jumps, or flossing, or tell a joke, or one go at charades, or share a fun fact, or something else. ense. As the question blocks are removed respond to them. You can utilise the activity tools or simply talk to each question. As each block is removed and responded to begin lining them up domino style. When the tower falls, respond to the remaining fallen block questions before completing your domino chain and then knock them over.

### Kit Extension - Body Mapping, Exploring Space

- This activity taps into a child's experience of the spaces they inhabit in relation to the service.
- It invites children to consider a space "Here I am at" and explore what they like the most and the least about it.
- This activity collects information that is body based and taps into children's preferred and least preferred areas within service spaces, as well as information about their sensory engagement with

### Kit Extension - Story crafting

- Story crafting emerged in Finland in the 1980s. It is a participatory & narrative approach.
- · How to Start:
- Encourage a child, group of children or even another adult:
   "Tell me a story, however you would like.
   I shall write it down exactly as you tell it to me.

- I will then read your story, and you can change or fix it if you like."
- Children often like to draw a picture of their story. Sometimes the picture comes first, and the story follows.
- The most important thing is an adult's active listening For people aged 1 year old elderly Great for cross-cultural encounters

### Kit Extension - Story crafting

- Child/Young Person with Worker
  Worker provides a photo prompt linked to the service
  Follow the story crafting process

#### Process:

- Process:

   "Tell me a story, however you would like.

   I shall write it down exactly as you tell it to me.

   I will then read your story, and you can change or fix it if you like."

(For our purposes today, partner up, invite the crafter to tell a story by putting themselves in the shoes of a child they work with or have worked with in the past, as that child considers arriving at the service)

### Data Representation Ideas- Part A. Gingerbread Me

- Part A. of the tool is a personalised change map for children, involving somatic, feelings based and cognitive response invitations, charting children's involvement across time with the service.
- One aspect of Part A. invites children to identify three of their main feelings at One aspect of Park A invites clinical to identify three of their main reellings at three points in time, when they first started, now when they come here, and how they expect they may feel in a year's time. Children can also scale these feelings as a child's sense of intensity of feeling may change over time. This information can be collated into word clouds which could provide organisations comparable data visualisations across time.

childhood.org.au

### **Word Clouds**

- St Joseph's Healthcare ICU in Hamilton, Canada
- Word Clouds were created for patients dying in ICU. This project was developed with the objectives of patients, and to help family members grieve. Word Clouds were intitally consciented as a gift to the family, as a way of coming to know and honouring the patient and family. While researchers initially hoped this gift would be meaningful, they came to realise it was much more than that, powerfully effecting the relationships among patients, family members and chindlens.

### **Word Clouds**

- When Obama was President he received 10,000 letters per day. He read and responded to 10 every day.
- responded to 10 every day.

  Aside from physically passing letters around, the administration also emailed out a daily word cloud derived from the letters— a visual representation for policy-makers of the issues concerning the public. The most re-occurring word across all of the compiled word clouds was 'Help.'

Australian Childhood Foundation PARTICE PARTICE PROPERTY OF THE PROPERTY OF THE PARTICE PARTICA PARTICE PARTICE PARTICE PARTICE PARTICE PARTICE PARTICE PARTIC

### Data Representation Ideas- Part A. Gingerbread Me

Children's drawing responses to the gingerbread shape invitations could provide organisations a comparable visual data set across time. This type of representation would be accessible to most and have immediate impact.

### Data Representation Ideas- The Paper Doll Project

The Paper Doll Project is the brainchild of two New Zealand children Emily (8) and Daniel (10) Barback. The children decided they wanted to do something after the recent Christchurch shootings. They want Kiwi kids to show the world "their New Zealand".

dolls that show kids of all different cultures together holding hands," Emily.

### Data Representation Ideas- Part B. 'My Experiences'

- The kit contains 16 closed ended questions which will yield categorical, frequency data. Services may benefit from comparing how respondents endorse items utilizing the 5 point scale over time.
- Content analysis of the qualitative data provided through children's responses to the 24 open ended questions could allow services to act on emerging themes to better meet the needs of its youngest service users.

childhood.org.au

# Some Themes from ACF's Pilot- Part A. Gingerbread Me ACF conducted a pilot of the kit with a small group of children and young people. A general theme across the ACF pilot when it came to responding to drawing invitations was that children and young people particularly focused on drawing their faces across time. Their drawn facial expressions seemed largely coherent with their identified 'main feelings' at each time point.

# Part 2. 'My Experiences' Experience of People Children communicated how their main worker took care of them at the service, in practical ways- through providing food and gifts, to more interpersonal/relational ways like histening to me. It is noted that workers administered the took with her clients and this is likely to have influenced responses. The tone of the open-field her interpersonal relational ways like histening to me. It is noted that workers administered the took with her clients and this is likely to have influenced responses. The tone of the open-field her interpersonal relationships with the scaled responses, children rated their experience with their workers on highly positive ways. Experience of Place Children offered improvement suggestions including changing the built environment as well as more relationally based suggestions, sibth as including alternals/pets. Many children also suggested free wi-fi as an improvement. Experience of Change Children's responses suggested they grasped how the service had helped them re-negotiate relationships with improtant people around them (mainly family), and they identified un-met goals that remained important.

# Part 2. 'My Experiences' Experience of Culture • Children and young people struggled to respond to these questions. Workers who administered the kif expressed the need and intention to focus more with clients on cultural endowment, heritage and impacts. Experience of Rights • The majority of children's responses to questions about the role of the service located the site for change or 'reason children attend' to be solely to do with a deficit within themselves. None cited broader family issues or anything else. This is important feedback our Therapeutic Services team is considering.

### **Beyond the Action Feedback Kit**

ACF is set to develop a space for an online community based around the encouragement of 'Children's Active Participation.' You are invited to join with us.

- It is envisioned that this will include:

- It is envisioned that this will include:

  A curated library of information, reports, articles, videos and examples of practice.

  Webinars with key international figures.

  A discussion feed related to supporting children and young people's active participation with services.

  Action Feedback Kit extension tools and manual updates.

  An area for people to share ideas and questions about their use of the Action Feedback Kit and extensions and variations relevant to their settings.

  Moderated forums for you to share practice wisdom, join with like minded others, and ask questions.
